

**David City Housing Authority
Portable Dishwasher Policy**

All tenants may have a small portable dishwasher provided that they have the approved proper fitting to our kitchen faucet. Before use, the maintenance personnel must inspect the connection.

Proper care must be given that faucet must not be abused to the effect that it could cause leaking around the fitting. The maintenance will inspect at the time of installation to insure no leaking of the "o" rings in the faucet. If leaking does occur while using the dishwasher it will be the responsibility of the tenant to pay for the repair.

The cost to the tenant will be \$6.00 per month. It is considered excess utilities just like small deep freezers.
